# INSTALLER'S MANUAL

Starting from version 5.x.x, the USB Dongle is used for licensing of PROS CS Software.

- Insert the USB dongle in the Server PC and the software will automatically recognize it.
- You will get notification that the software is licensed in both PROS CS client and server as depicted in the pictures below.

There are two licensing levels:

1. Free license: applied by default when downloading the software, without having to use any USB license key
2. Full license: applied when the USB license key is inserted in the Server PC

v.b1
